But we pink , Dark eye . Faint eye ring . No distinct ear path as weald be the case in a clay-cobured sparrow . Supercilium pale grey and quite wide . Crown was brown with a series of dark thin stripes. No median strip . Breast was pale grey as was belly. Noticeably long notched tail. Tail was rearly as long as beak-to-tail-base measurement. Over all impression was of grey but so light that it there was a buffy shade anywhere, it was in upper breast on sides near shoulders. Failed to notice whether or not wing bars were present.

Earlier in the day, at about 1645 MOT, with Strart Alexander, we undoubtedly saw the same birds) and to me, through binocular sat 15 m distance, the breast was buffy rather than grey we saw two birds briefly in sight. One took a submissive posture with fluttering wings and uptwood open back. The other briefly assumed a mounting position, but much too quickly for copulation to have occurred.

There were two birds seen both during the ofteneon and early evening attempts. However, only one remained visible during the evening. Occasional attempts. However, only one was vocal. Most of the time, the involved both birds, but only one was vocal. Most of the time, the birds were hidden, although constantly naving. Once a tape of chipping sparrows, vesper sparrows, and Brewer's sparrows a vorte played, the second bird was not seen a gain, while the bird described above came outside the shrubbery and vocalized frequently in plain sight to those with binocalars

GOT PHONE CALL FROM TERRY KOROLYK AT ABOUT 1715 MDT WHO
TOLD ME HE'D SEEN A KENTUCKY WARBLER AND WANTED CONFIRMATION.
HE DESCRIBED A METALLIC 5-PART "CHIP" OR "CHIMP." I CONSULTED A
PETERSON GUIDE FOR EASTERN NORTH AMERICAN BIRDS SINCE I MAD NEVER
SEEN THIS SPECIES. I DID NOT LISTEN TO ANY TAPE RECORDING.

1800 MOT I CEFT THE WEASELHEAD PARKING LOT AND AT 1803MDT ARRIVED AT THE BASE OF THE HILL WHERE THE BIKE PATH SWINGS WEST, THE REPORT WAS THAT THE BIRD WAS WEST OF THE PATH BUT IMMEDIATELY I HEARD A 5-PART "CHIMP" SOUND FROM THE GAST SIDE, I CRAWLED THROUGH SOME SHRUBBERY AND LISTENED TO 2 MORE CALLS BEFORE GETTING INTO POSITION. A SPARROW-SIZED , SLOW MENING BIRD (LIKE A VIRED SPEED) WAS IN A DOGWOOD, AND MOVED INTO SIGHT WHERE IT CALLED AS I RAISED MY BINOCULARS AND FOCUSSED. IN THE THREE SECONDS BEFORE IT FLOW IT WAS OBVIOUS IT WAS A KENTUCKY WARBLER, THE BLACK HOOD AND BLACK STRIPE RUNNING DOWN THE NECK WERE SO VISIBLE, IT APPEARED AS IF THEY HAD BEEN BACK-LIT. THE REST OF TITE BIRD WAS RATHER DRAB, ALTHOUGH THE BACK MIGHT BE DESCRIBED AS OLIVE TO KHAKI GREEN. I DID NOT HAVE TIME TO SEE AN EYE-RING, OR IF WING BARS WERE VISIBLE, OR THE SHAPE OF THE BILL. THE BIRD MOVED SOUTH THROUGH THE SHRUBBERY AND THEN I SAW HOWARD GILES AND INVITED HIM TO SEE THE BIRD. ALTHOUGH I HEARD IT CALL PERHAPS BORA TIMES, AND SAW ITS SILOUETTE WHEN IT FLEW, I NEVER DID GET ANOTHER CLEAR LOOK. THE BIRD THEN APPEARED TO FLY WEST AND NORTH, CALLED TWICE MORE AND WAS QUIET FOR PERHAPS 15-20 MINUTES, IT CALLED ONCE MORE NOTE THE ORIGINAL LOCATION JUST AFTER REID BARCLAY ARRIVED AND HE AGREED THAT THE CALL NOTES WERE DIAGNOSTIC . HE WAS FAMILIAR WITH THE SPECIES FROM POINT PELEE IT OLD NOT CALL AGAIN BEFORE I LEFT AT HOBBUT 1930 MDF

ENTERED NOV. 28/14 25/19 PROOFED Nov. 29 9408 695 DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

and, Seautiful, red bird with black wings, about the size of an account, was first seen (lateral view) perched on a branch near the top of a dead tree and about 50 feet away. When we spoke it flow a short distance (about 25 feet) in a straight line to the top of another dead tree and sat facing us. O we debated about the species after watching it for 3-4 minutes we continued on to Wesselland parking literal home by 1700 hrs. The following day at our Calgary Matural History class at Jot Calgary, I rasked John Mc Jaul about this unusual bird.
